

Ozone Detection Device

Pro Ozone Badge

Humidity influences ozone levels! Now there is a detection device to let you know your ozone level in varying humidity levels. Guaranteed Accuracy & Guaranteed Results!

Features

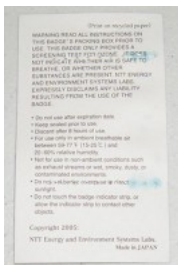

- chart compensates for humidity
- Ideal for companies that need to test for 8 hr EPA Standard
- Perfect for Laboratories or Government Agencies
- does not require cool storage
- distinct color changes for each ozone level
- 12 Month Shelf Life
- easy to use instructions

Product ID: **B1-P**
 In Stock: **Yes**
 Price: **\$19.95**

Specifications

Accuracy +/- 10%
 Response time within 5 minutes at high (greater than 8 PPM) ozone levels
 Operating Temperature between 59-77 deg F (15-25 deg C)
 Operating Humidity between 20-60% relative humidity
 Expose to NO
 Sunlight
 Usable life 8-hours
 Restrictions Not for use in non-ambient conditions such as exhaust streams or wet, smokey, dusty, or contaminated environments.
 Shelf Life 12-months from Manf. date (Refrigeration not required)
 Usage Ready to use upon delivery - Just open foil

Instructions Included

The Pro Badge comes with complete usage instructions on the back.

Pro Badge & Industrial Ozone Generators

Industrial ozone generators are prone to internal leaks due to the many connections. This ozone badge will quickly display any residual ozone that may be present.
