

H2O-Mini Ozone Injection System Rental

This miniature ozone injection system is perfect for treating small water samples, or small water volumes. This light weight & portable unit can be setup within five minutes. Use it in the field or take a water sample and use the self priming pump to pull it into the contact tank. Great for laboratory or pilot study applications!

Component Description

- 1- Water Inlet
- 2- 40 mesh particle filter
- 3- self priming pump
- 4- Kynar Injector
- 5- Injector bypass valve
- 6- Outlet pressure gauge
- 7- Inlet pressure gauge
- 8- Ozone gas inlet
- 9- Air/ozone vent
- 10- Mounting feet
- 11- 1 gallon contact tank

Key Features:

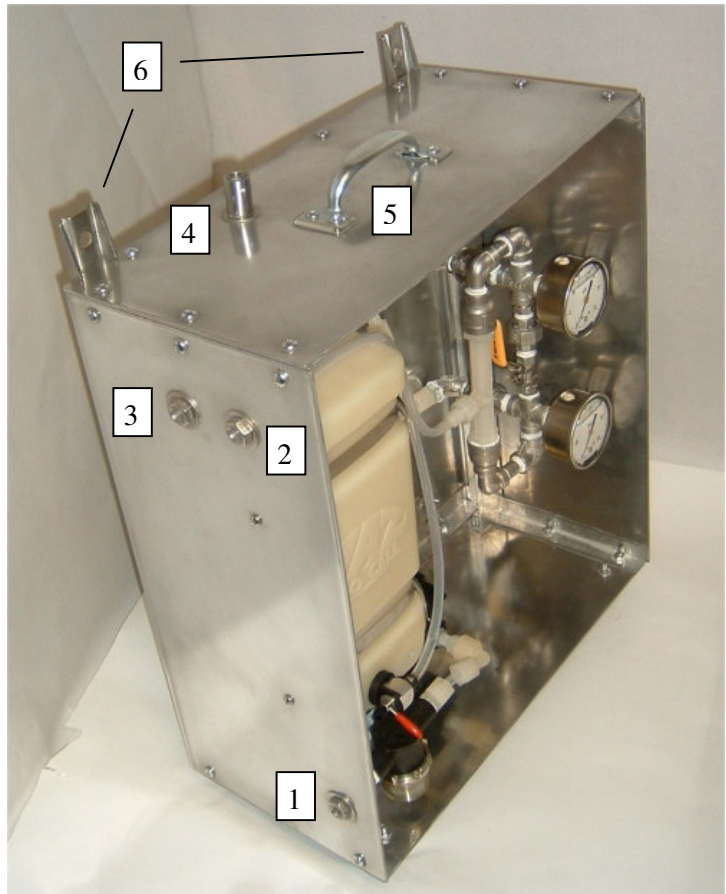

- ◆ treats between 0.5 - 1.7 GPM – (Ozone Solutions will install the necessary pump before shipment)
- ◆ up to 20 mg/l of ozone dosage – ozone generator can be rented separately
- ◆ 40 mesh filter removes particles for trouble free operation – 80 mesh also available
- ◆ portable - lift handle for easy transport
- ◆ efficient Mazzei venturi ozone injection - injector bypass included
- ◆ stainless steel & Kynar Mazzei injection system – can inject up to 2 LPM
- ◆ ozone compatible degasser
- ◆ three connections (1/4" FPT water inlet and outlet, 1/8" FPT ozone connection)
- ◆ can be set on level surface or mounted on wall

Specifications:

- ◆ 110V/60Hz - 50W (220V/50Hz available)
- ◆ 18 lb weight
- ◆ 16" wide x 18" high x 8" deep
- ◆ 1 gallon contact tank

Stainless steel couplings allow easy removal of injection arm if injector becomes plugged.

- 1- 1/4" FPT water inlet
- 2- 1/8" FPT ozone inlet
- 3- 1/4" FPT water outlet
- 4- 1/4" MPT ozone vent
- 5- handle
- 6- mounting brackets (optional)

Includes ODS-1 to destroy ozone off gas

Terms: \$165/week portal to portal – client to pay all shipping expenses
