

10,000 mg/hr ozone generator

High Flow Ambient air Ozone generator produces 10,000 mg/hr

XG-10T is an extremely powerful commercial grade ozone generator for remediation work. This unit generates 10,000 mg/hr ozone from the ambient air, a powerful 100 CFM blower moves ozone throughout even the largest area.

Features

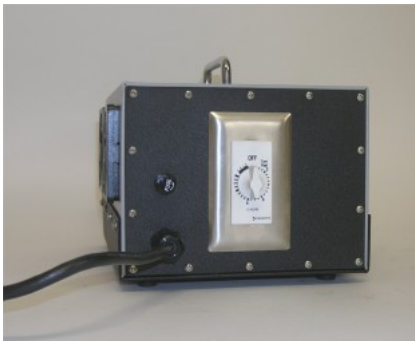

- 10,000 mg/hr ozone production
- Simple operation
- Very low maintenance
- Compact size for ozone production
- Rugged aluminum chassis
- Included timer for automatic operation

Product ID: **XG-10T**
Lead Time: **1 week**

Specifications

Capacity:	10,000 mg/hr ozone production via high frequency & high voltage
Air flow:	High flow 100 CFM Blower
Enclosure:	Powder coated aluminum chassis
Generation Method:	Glass Dielectrics, require less cleaning and maintenance than mica plates
Supply gas:	Ambient Air
Timer:	12 hour timer with Continuous ON setting
Warranty:	Complete 4 year, (parts and labor)
Dimensions:	12-in x 9.5-in x 7.5-in
Weight:	15 lbs (6.8 kg)

Rear Panel Of XG-10T

This view shows the operation and timer of the XG-10T

Rear Image

This picture shows the rear of the XG-10T, the controls are mounted to the rear of the machine, while air is pulled in the sides through the filters.

Filter Replacement

All of the air pulled through the XG-10T is filtered through the small 3-in square filters. These can be cleaned easily by removing the plastic grates. Replacement filters are also available if necessary.

Dual XG-10Ts

Dual Units product incredibly high ozone concentrations.
